

SAKSHI KALE

Cloud & AWS DevOps Engineer | Kubernetes (EKS) | Terraform | CI/CD Automation

Mumbai, Maharashtra | +91-7620285536 | sakshikale0910@gmail.com | linkedin.com/in/sakshi-kale

SUMMARY

DevOps Engineer with 4 years of experience in Kubernetes EKS, Terraform, CI/CD automation, cloud infrastructure, and production support. Hands-on experience in Jenkins pipelines, AWS infrastructure provisioning, Docker-based deployments on EKS using Helm, and monitoring with Prometheus, Grafana, and CloudWatch. Skilled in incident troubleshooting, RCA, Linux, Ansible, Bash, Python, IAM, VPC, ECR, and cloud automation.

TECHNICAL SKILLS

- Cloud Platforms: AWS EC2, VPC, IAM, EKS, S3, RDS, ECR, Secrets Manager, CloudWatch, Azure Fundamentals
- CI/CD & DevOps: Jenkins, Git, GitHub, SonarQube, AWS ECR, CI/CD Pipeline Automation
- Containers & Orchestration: Docker, Kubernetes, Amazon EKS, Helm
- Infrastructure as Code: Terraform
- Configuration Management: Ansible
- Monitoring & Observability: Prometheus, Grafana, AWS CloudWatch, Log Analysis, Alerting
- Scripting: Bash, Python, YAML, Linux
- Networking & Security: VPC, Security Groups, IAM, Load Balancers, Secrets Management
- Production Support: Incident Management, RCA, Troubleshooting, Log Analysis, Deployment Support

PROFESSIONAL EXPERIENCE

DEVOPS ENGINEER — CAPGEMINI, MUMBAI | AUG 2022 – PRESENT

- Designed and maintained CI/CD pipelines using Jenkins, Git, SonarQube, Docker, and AWS ECR, reducing deployment time by 50% and improving release reliability.
- Developed reusable Terraform modules for VPC, EKS, RDS, IAM, security groups, and networking resources, enabling consistent multi-environment infrastructure provisioning across dev, staging, and production.
- Containerized applications using Docker and deployed them on AWS EKS using Kubernetes manifests and Helm charts, improving deployment consistency and scalability.
- Managed Kubernetes workloads on AWS EKS, including deployments, services, ingress, ConfigMaps, Secrets, and application rollouts to ensure stable and scalable deployments.
- Implemented monitoring and alerting solutions using Prometheus, Grafana, and AWS CloudWatch, improving observability, reducing MTTR, and proactively identifying system issues.
- Automated infrastructure provisioning and recurring operational tasks using Terraform, Ansible, Bash, and Python, reducing manual effort by approximately 30%.
- Diagnosed and resolved production issues using logs, metrics, and troubleshooting analysis across application, infrastructure, Linux, deployment, and Kubernetes environments.
- Strengthened security posture by implementing IAM least-privilege policies, container image scanning, SonarQube quality gates, and secure secrets management using AWS Secrets Manager.
- Collaborated with development, QA, and infrastructure teams to streamline deployments, resolve incidents, and maintain CI/CD and infrastructure documentation.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals — Sep 2024
- AWS Certified Developer – Associate — (In Progress)

EDUCATION

Bachelor of Engineering (Computer Science) — Sant Gadge Baba Amravati University | 2018–2022
